PROFESSIONAL SUMMARY

Project Manager with 5 years experience building conversational-AI products in regulated, high-security BFSI environments. Owned a Tier-1 bank voice-AI product end to end driving a **4.5x increase in containment** worth $1M in annual savings and revenue impact. Now owns roadmap and delivery for a BFSI voice-AI portfolio at roughly **4M calls per day**, and owns vendor-risk audit readiness for two banking clients. **Increased the revenue by 60%** on one collections book, and a **7.5% lift in engaged calls**, the billing driver, on the other.

CORE COMPETENCIES

- **Delivery & Agile**: Epics, user stories, backlog prioritization, sprint retrospectives, UAT and production go-lives, risk and incident management, stakeholder management, cross-functional leadership
- **Product Management**: Product vision, roadmap planning, product requirements, use-case prioritization, KPIs and success metrics, business cases and ROI models, lifecycle ownership
- **AI & LLM**: AI governance, LLM evaluation, Agentic AI, Agentic workflows, Hallucination audits, Human-in-the-Loop design
- **Technical and Data:** Conversational AI (ASR, NLP, TTS), API design and integration, Python, PostgreSQL, Metabase, Jira, AWS VPC deployment, air-gapped Kubernetes

PROFESSIONAL EXPERIENCE

Project Manager, Skit.ai, Bengaluru

July 2021 to Present

Flagship Tier-1 bank deployment, end-to-end ownership:

- **Delivery:** Owned product strategy and end-to-end delivery of an enterprise voice-bot in an air-gapped environment (100K+ calls per day), integrating 80+ core-banking APIs across engineering, data-science and design teams. Drove a **4.5x increase in containment** and $1M in annual savings and revenue impact for BFSI Account.
- **Risk and Incident Remediation:** Cut incident detection time by **98%** with a real-time diagnostics and alerting product. Rebuilt the containment metric after an audit exposed undefined success criteria and 50+ tracking bugs, making delivery metrics independently auditable by the bank.
- **Product Roadmap & Lifecycle:** Shipped 50+ conversational use cases through UAT to production sign-off, taking **SLU accuracy from 70% to 91%**.

BFSI Enterprise voice-AI portfolio, roughly 4M calls per day, 12 languages:

- **Commercial and Analytical**: Drove a **60% increase in credit card collection account** through data driven call routing and strategy. Developed per-flow hour allocation strategy increasing the call engagement by 7.5%.
- **Governance and Capacity:** Reconstructed untracked project backlogs into 94 governed issues with single-source-of-truth Jira boards across all accounts using AI Agent, caught two compliance exposures before development started, and built the telephony capacity business case for **scaling 1.2M to 4.5M calls per day**.
- **LLM evaluation:** Built the LLM evaluation loop for production bots: 12,000+ LLM-judged calls at 95.4% precision on the flagship intent, and a 100-call quality audit that re-ordered the fix roadmap.
- **Internal Product and Enablement**: Designed and shipped a multi-agent delivery-management system with human-in-the-loop approval on every external write: daily planning, EOD review, commitment-drift detection across all accounts, cutting management bandwidth by 75%.

Consultant, Netscribes, Kolkata

February 2021 to July 2021

- **Automation and Data Integrity:** Built internal automation workflows for audio processing and text annotation, accelerating delivery timelines by 30%.

EDUCATION

- B.Tech, Computer Science and Engineering, MAKAUT, West Bengal (2019) with CGPA 8.23
- Co-founded and led Club Vision
